TITLE: Water redispersible cationic resin
powder - prepd. by drying and powdering (1) cationic vinyl
polymerised aq. emulsion opt. mixed with (2) water
soluble high molecular cpds.

PATENT-ASSIGNEE: HOECHST GOSEI KK[FARH]

ABSTRACTED-PUB-NO: JP 59030827A

BASIC-ABSTRACT:

The present cationic resin powder is insol. in water. Pref.
(1) includes an
emulsion prepd. by adding cationic cpds. to nonionic or
weakly ionic vinyl type
polymer aq. emulsions or prepd. by emulsion-polymerising

vinyl monomers in a
system where cationic gp.-contg. cpds. are introduced.
Cationic cpds. pref.
include cationic starch, alkylamines, alkylaminoethanols.
For introduction of
cationic gp.-contg. cpds. into the emulsion polymerisation
system, cationic
gp.-contg. emulsifiers, e.g. cationic PVA, or cationic
gp.-contg. comonomers
e.g. dimethylaminoethyl (meth)acrylate, or cationic
gp.-contg. polymerisation
catalysts e.g. 2,2-azobis(2 -amidinopropane) are used. Use
of (2) improves the
redispersibility of the resin powder.

The present resin powder has good redispersibility in water
and, when
redispersed, shows high adherence and film-forming property.
